

Fire

A story to talk about

www.alexisreed.com

**Fire is
powerful.**

**Fire can be
helpful.**

We can keep warm with a fire
in a wood stove.

We can make smores
over a campfire.

Do you like smores?

We can use fire to celebrate.

What do you use candles for?

Some dancers perform with fire.

Have you seen fire dancers?

Fire is
powerful.

Fire can be
harmful.

Fires can start in a forest
and burn many trees.

Fire fighters do their best
to put the fire out.

Sometimes fires are too big for the fire fighters to put out.

So the fire fighters work to keep the fire away from houses. They wait for rain to help put the fire out.

When fire burns,
it makes a lot of smoke.

The wind can blow the smoke
into town.

Smoke can make the sun
look red.

How does the sky look today?

The smoke is dangerous to breathe. It can hurt our lungs.

How do you feel now when you take a deep breath?

We have to stay inside to stay away from the smoke. It can be so frustrating to stay inside!

Our feelings can get really big.

How are you feeling now?

We try to find fun things to do
while we're inside.

What else can you do
for fun inside?

If we have to go outside to go somewhere, we wear a mask.

What's your mask like?

When the wind or rains come,
the smoke will clear.

We will be able to spend time
outside again!

What will you do outside?
